Academic Year 2026–2027

1. Executive Summary & Concept Rationale

The Campus Coffee Cart is a mobile, high-efficiency specialty beverage kiosk designed specifically for the collegiate environment at STI West Negros University. By bridging the gap between premium third-wave coffee quality and student-friendly pricing, the business targets early-morning commuters, exam-season study groups, and faculty members seeking swift service without leaving campus grounds.

> **KEY DEFINITION — Value Proposition:** High-speed espresso extraction in under 60 seconds, localized Negros-sourced coffee beans, cashless QR payments, and sustainable biodegradable cups.

Operational Workflow Architecture

The cart features a streamlined linear workflow to ensure zero bottlenecking during peak 15-minute class changeover intervals:

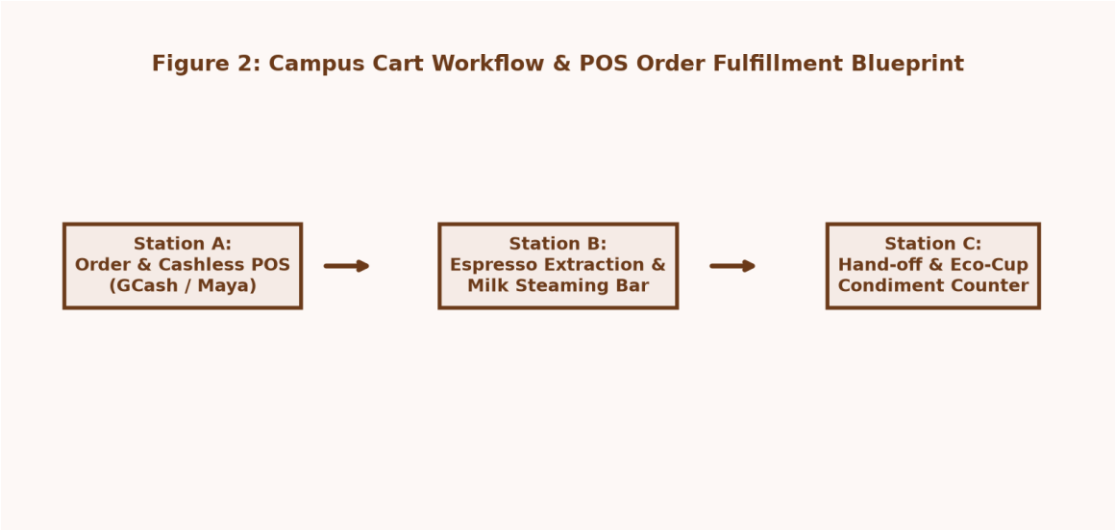

Figure 1: Campus Cart Workflow & POS Order Fulfillment Blueprint.

2. 12-Month Financial Projections & Unit Economics

With an initial capital expenditure of ₱120,000 covering commercial espresso machinery, mobile chassis fabrication, and initial inventory, the business achieves operational break-even by Month 2, accelerating to substantial net operating margins by mid-year.

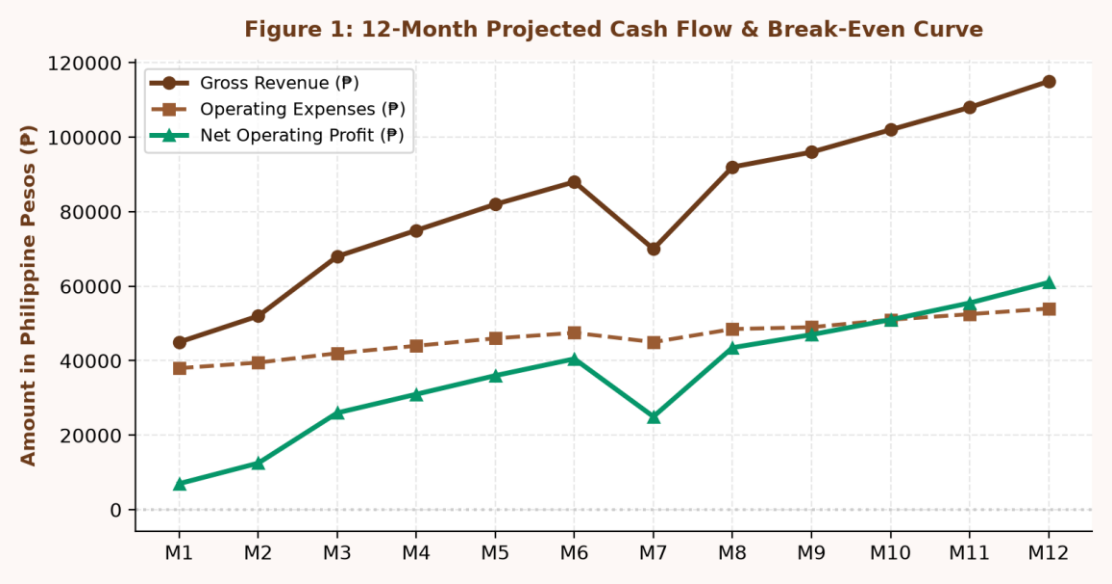

Figure 2: 12-Month Projected Revenue, Expenses, and Net Margin Curve.

Core Menu Unit Economics

Product Item	COGS (₱)	Retail Price (₱)	Gross Margin (%)
Iced Americano (16 oz)	₱18.50	₱55.00	66.4%
Spanish Latte (16 oz)	₱24.00	₱75.00	68.0%
Cold Brew Nitro Infusion	₱22.00	₱70.00	68.5%

3. Strategic Growth & Campus Loyalty Program

To solidify customer retention, the venture will introduce the 'BrewPass' digital loyalty stamp system integrated into student smartphones via GCash and Maya miniprograms. Customers earn 1 free drink for every 8 purchases, driving recurring campus foot traffic.

Risk Mitigation Strategy

• Power Reliability: Dual-battery backup inverter guarantees unhindered refrigeration during campus brownouts.
• Raw Material Price Fluctuations: Direct quarterly procurement contracts with local mountain cooperatives in Canlaon and Silay.
• Quality Consistency: Standardized recipe cards and volumetric grinder dosing ensures uniform cup profiles across student barista shifts.
