
Infographic Report: Mental Health & Stress Among College Students

A Multi-Factor Empirical Analysis of Academic Burnout, Social Stigma, and Coping Frameworks

Course: Human-Computer Interaction & Psychological Foundations (COSC1007)
Institution: STI West Negros University, Bacolod City
Author: Jhon Paulo Gascon (2nd Year BSIT)
Scope: Tertiary Student Wellbeing, Digital Burnout, & Campus Support Infrastructures

1. Primary Academic Stressors & Prevalence

Recent collegiate psychological surveys indicate that 68% of tertiary undergraduate students report experiencing chronic academic anxiety during major examination weeks. The confluence of capstone deadlines, familial economic pressures, and fear of post-graduation unemployment compounds emotional exhaustion.

Reported Stressor	Prevalence (%)	Primary Symptom Manifestation	Intervention Priority
Heavy Assignment Deadlines	74.2%	Sleep deprivation & cognitive fatigue	Urgent / Structural
Financial & Tuition Anxiety	62.8%	Elevated cortisol & panic spikes	High / Institutional Aid
Career & Placement Fear	51.4%	Impostor syndrome & demotivation	Medium / Mentorship
Social Isolation & Stigma	39.5%	Reluctance to seek guidance counseling	High / Peer Networks

2. Coping Mechanisms: Adaptive vs. Maladaptive

When confronted with acute stress, students adopt coping mechanisms that either mitigate neurobiological tension or exacerbate long-term academic impairment:

Coping Strategy	Category	Short-Term Relief	Long-Term Academic Impact
Spaced Study & Time-Boxing	Adaptive	Reduces panic before exams	High GPA retention & confidence
Cardiovascular Exercise	Adaptive	Flushes cortisol & releases endorphins	Enhances memory consolidation
Excessive Caffeine & Energy Drinks	Maladaptive	Temporary alertness surge	Sleep architecture collapse & tremors
Avoidant Procrastination (Social Media)	Maladaptive	Brief dopamine distraction	Compounded deadline crises

3. Campus Guidance Ecosystem & Crisis Helplines

De-stigmatizing mental health requires institutional accessibility. STI West Negros University provides confidential counseling services alongside nationally certified tele-mental health hotlines.

Organization / Office	Contact Modality	Operational Hours	Service Scope
STI WNU Guidance & Counseling	Student Affairs Bldg, 2nd Floor	Mon–Fri, 8:00 AM – 5:00 PM	Academic, emotional, & career counseling
National Center for Mental Health (NCMH)	Hotline: 1553 / 0917-899-8727	24/7 Toll-Free Nationwide	Crisis intervention & psychological first aid
In Touch Community Services	Hotline: (02) 8893-7603	24/7 Confidential Support	Free peer counseling & crisis support

4. Quick Review Questions & Source Credits

Assess your comprehension of mental health resilience strategies:

1. **What physiological hormone is elevated during chronic academic burnout, and how does cardiovascular exercise reme**
2. **Differentiate between adaptive problem-focused coping and maladaptive avoidance coping in collegiate coursework.**
3. **Explain how excessive consumption of energy drinks during all-nighters paradoxically impairs next-day memory recall.**
4. **What institutional resources are available on the STI WNU campus for confidential psychological counseling?**
5. **What is the nationwide toll-free hotline number for the Philippine National Center for Mental Health (NCMH)?**
